Executive Summary

2021-2022

During 2021-2022, Bright Association directly reached 100 children through activities supporting refugee and internally displaced children and young people in Yaoundé. Our work brought together access to education, digital learning, photography, tennis, peace education and community engagement.

Partnerships

The period combined sustained programmes with targeted events and individual assistance. Partnerships enabled us to offer practical learning opportunities, support school enrolment, continue sports activities and connect young people with mentoring. The clearest educational result was the success of all ten Back to School scholarship recipients who sat the Ordinary Level examination in 2022.

Key Results

Key Measure and Reported Result

The total of 100 direct beneficiaries represents the overall reach across the two years. Participation figures for individual activities describe programme delivery and are not additional beneficiaries.

Purpose and Objectives

Purpose

Our work aimed to support young people's education and development through opportunities to learn, practise skills and participate in their communities.

Our main objectives were to:

- Support school enrolment and progression through financial assistance and scholarships.
- Provide practical skills in computer programming, product management and photography.
- Encourage physical activity, personal expression and peaceful coexistence.
- Respond to individual needs and promote leadership, environmental awareness and respect for women's rights.

Education Skills and Leadership

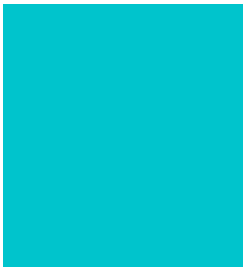

Access to Schooling

In August 2021, we launched the Back to School campaign to raise funds for internally displaced young people to return to school. Support mobilised for the September school return enabled children to enrol in evening classes at Saint-Benoît Catholic College.

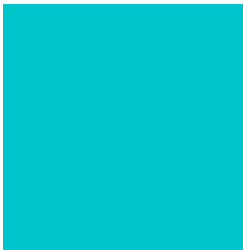

Computer Programming and Product Management

We established a collaboration with Mentors Without Borders in 2021 and continued it in 2022. The digital training aimed to strengthen practical skills and expand learning opportunities.

Mathematics Support

In 2021, we collaborated with local teachers to provide mathematics teaching for displaced young people. The activity aimed to strengthen mathematical skills and support their preparation for continued schooling.

Peace Education

In January 2021, we collaborated with Amala Education through the Peace Building in My Community programme. The training focused on helping refugee and internally displaced young people live harmoniously with different communities and understand the importance of peaceful coexistence and mutual respect.

Individual Scholarships

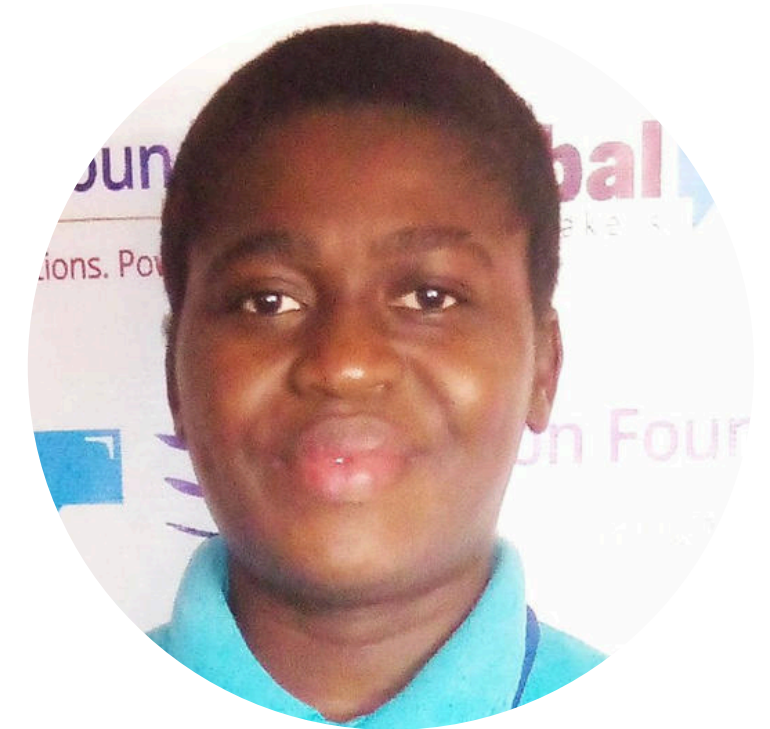

Continuing support beyond initial enrolment

The 2021 Back to School record lists a scholarship of 200 dollars for Fru Patience Ndeusse through Essungue Ejuma Foundation. In September 2022, Ordinance dione Emanga Kolle received a scholarship support from the The Ansama Teh Scholarship to cover her school fees for upper Sixth Art.

Photography Storytelling and Sport

Photography Workshop

5 to 9 July 2021

Lens On Life Project

Photography professionals from Cameroon worked with Lens On Life Project to teach the children the foundations of photography. After the workshop, we selected photographs taken by the children for an exhibition organised with Yaoundé III Council.

Tennis

Tennis Club of Yaoundé

Child Development

From January to December 2021, we trained 100 refugee children in tennis. The activity aimed to support their physical development and psychological wellbeing. Tennis activities continued in 2022, with sessions held every Sunday.

Photography Programme Canon

The written 2021 record identifies a collaboration with lens onlife through which 20 young people from Cameroon's North and South regions graduated from photography training. Photography was presented as a skill they could use for social change.

Tebo

In July 2022, we helped Thabo, an internally displaced young person from the North-West region, obtain a birth certificate.

16 Days of Activism

against Gender-Based Violence, December 2021
, at the invitation of Plan International and UNHCR

Community Engagement

Environmental Awareness

In November 2021, we organised an environmental awareness day in partnership with Greenpeace Africa. The activity aimed to help young people understand how to protect their environment and recognise behaviours that could harm it.

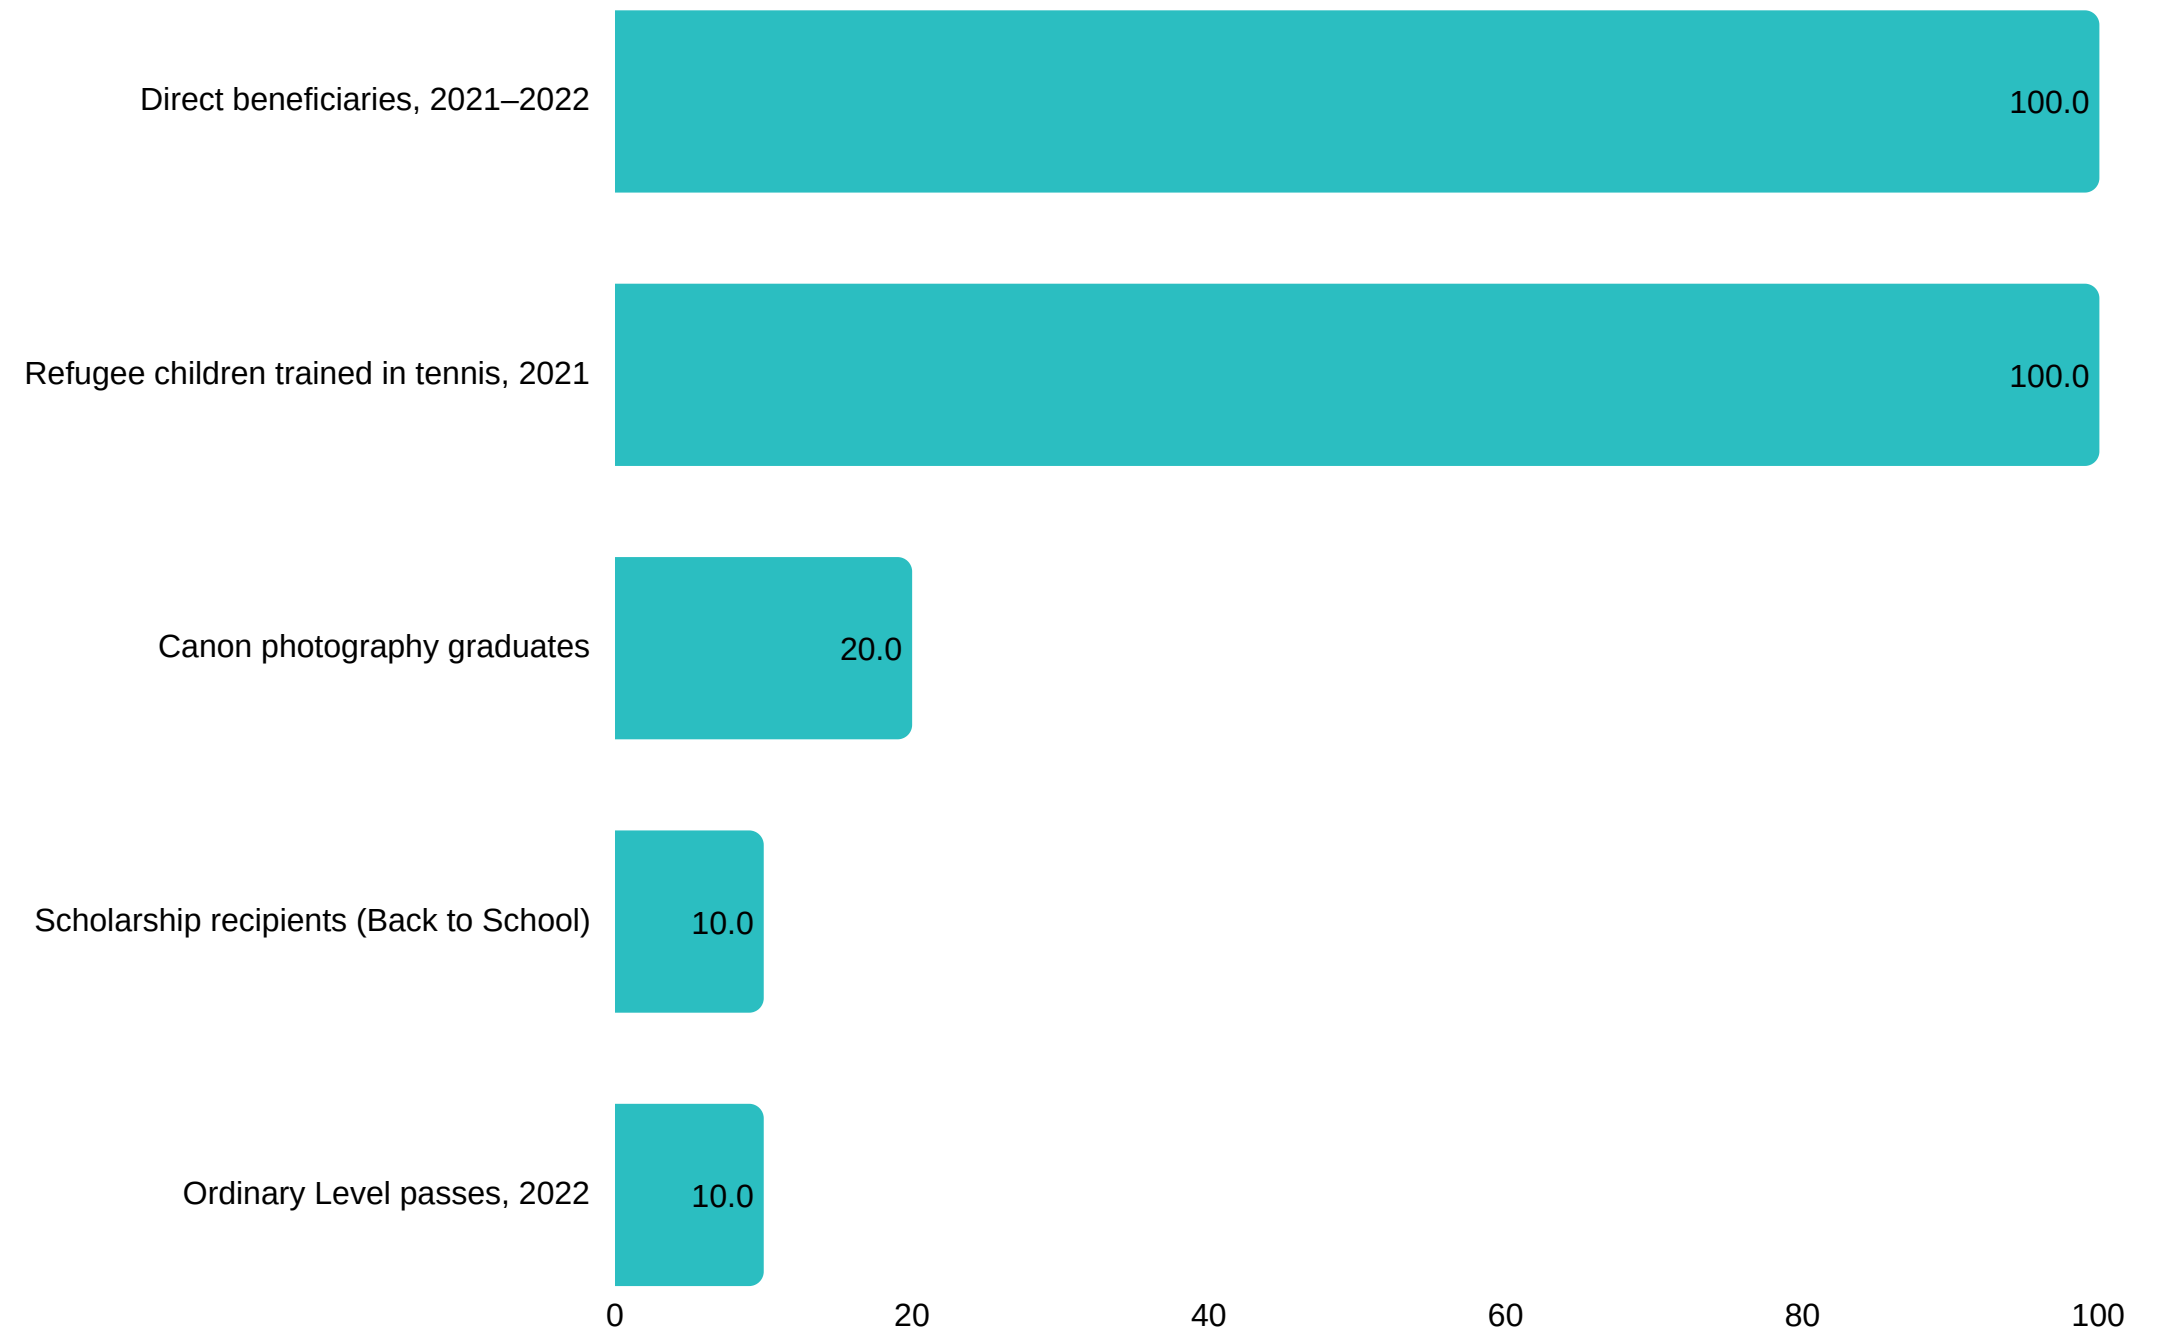

Results

The main reported results were:

- An overall direct reach of 100 children across 2021–2022.
- School enrolment support through Back to School and further scholarships for continued study.
- Successful Ordinary Level examinations for all ten candidates in the scholarship cohort in 2022.
- Completion of an introductory photography course, the presentation of participants' work in an exhibition, and continued photography training.
- Continued access to tennis, digital learning and peace education.
- Selection of a student for Youth Inspiration and assistance for a displaced young person to obtain a birth certificate.

Number of impacts, children and young people, 2021–2022

Participation figures for individual activities describe programme delivery and are not additional beneficiaries.

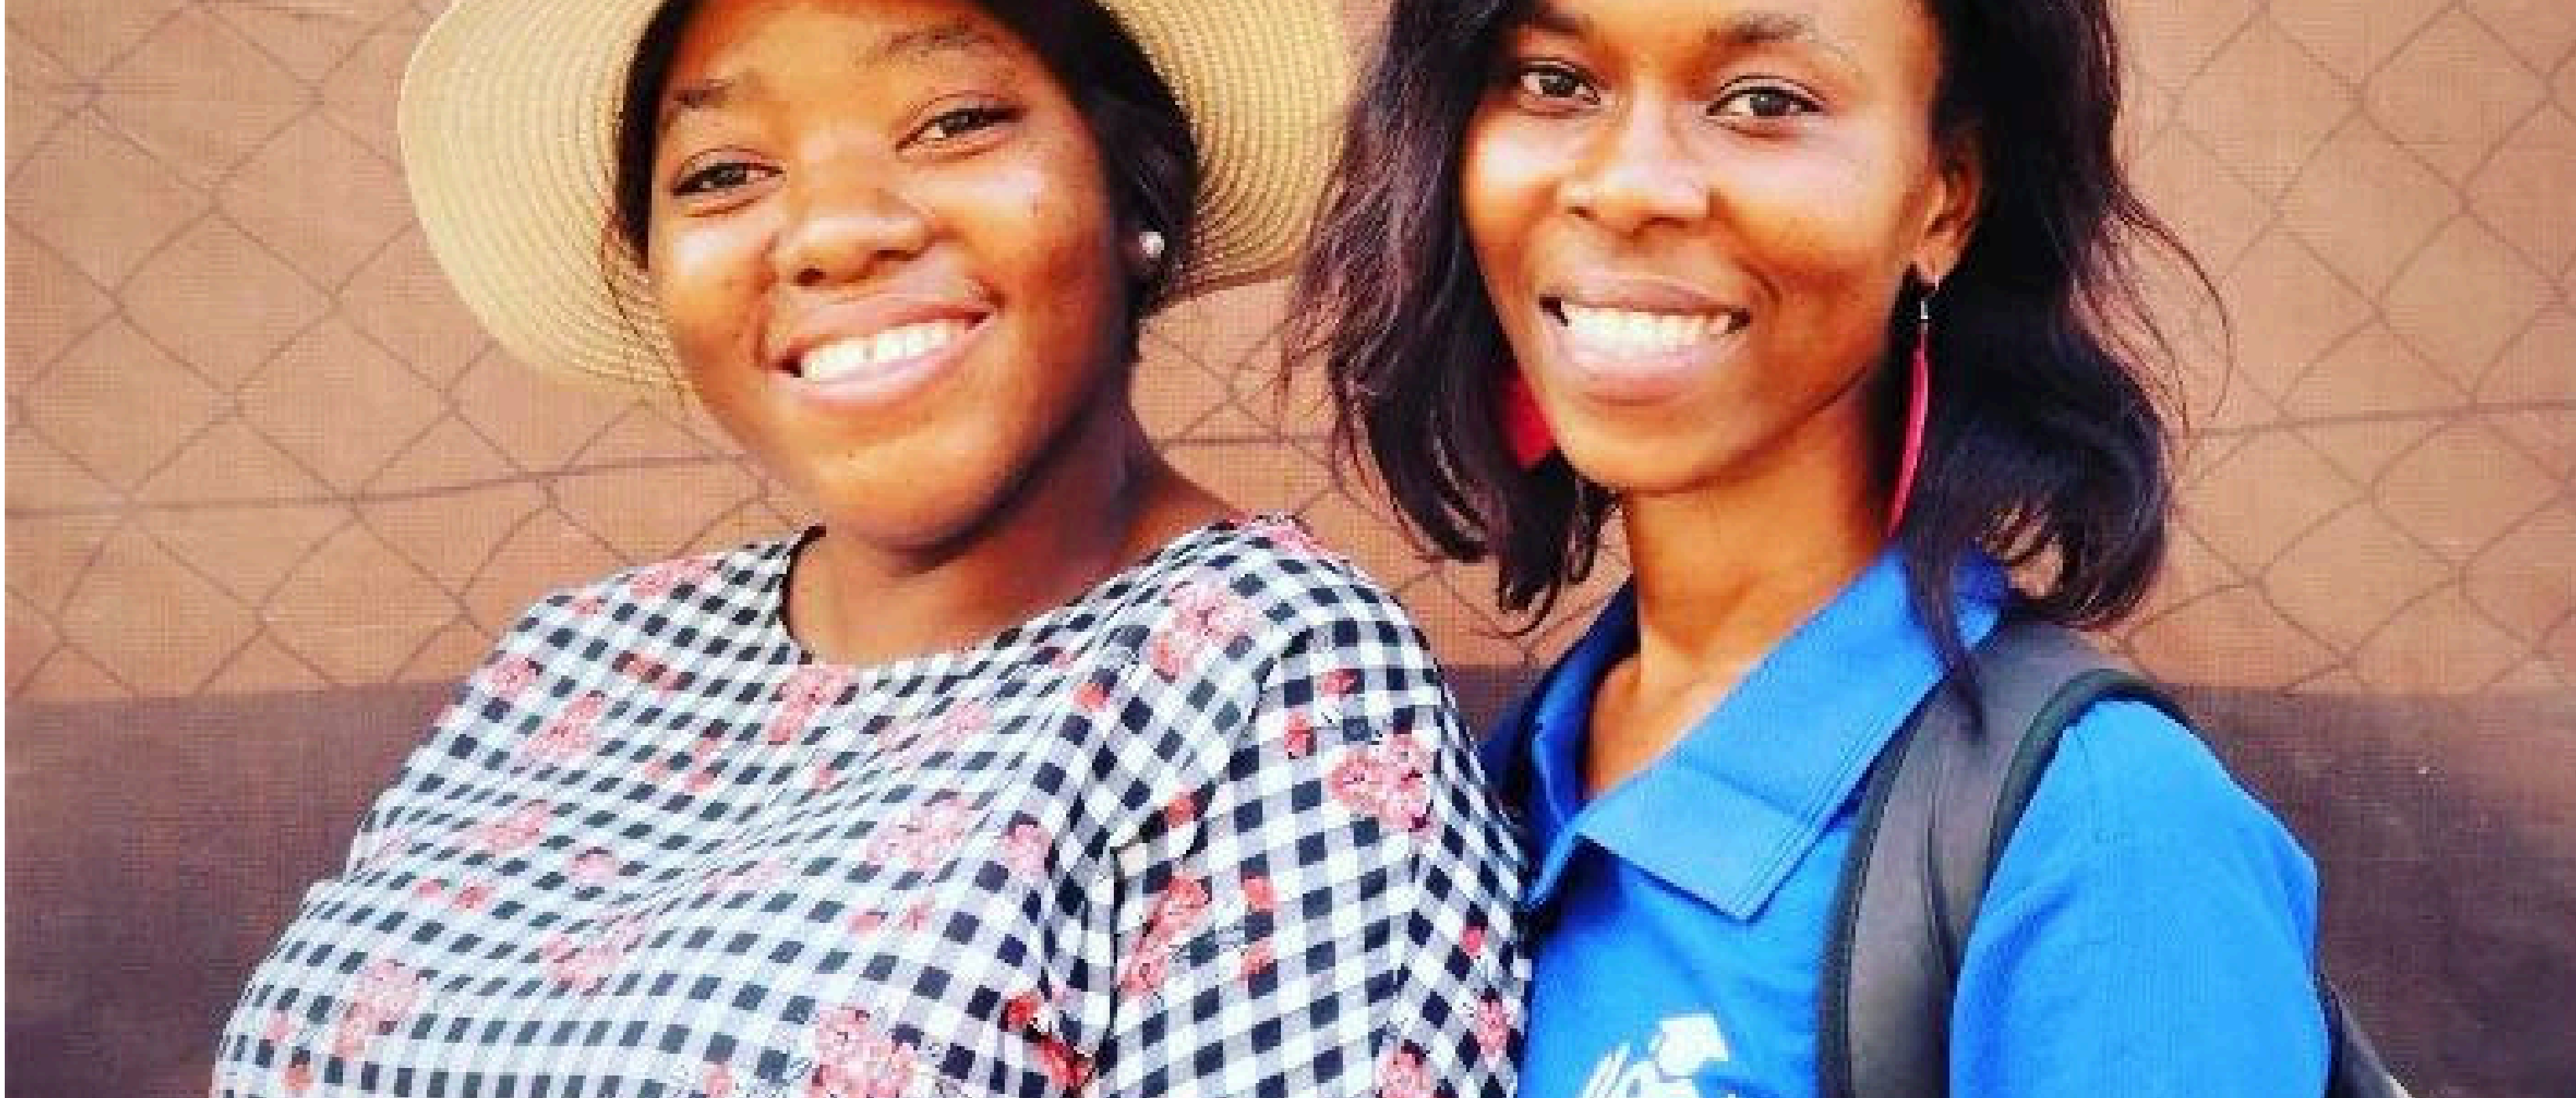

Essungue Ejuma Foundation

A further contribution of 1,000 dollars was received in September 2022.

\$2,300 + **150,000 CFA francs**

Total contributions listed for school enrolment and continued education. The 2021 contributions supported enrolment in evening classes at Saint-Benoît Catholic College.

Partnerships

Our activities brought together educational partners, sports and photography providers, scholarship supporters and local institutions. Amala Education and Mentors Without Borders supported learning programmes. Lens On Life Project contributed photography training, a laptop, a camera and school support, while the Tennis Club of Yaoundé supported sports delivery.

Challenges We Faced

Displacement

Our activities supported refugee and internally displaced children and young people. Thabo, from the North-West region, had been left without documentation after fleeing the Anglophone crisis.

Access to School Fees

Internally displaced young people needed financial assistance to return to school. The Back to School campaign raised funds so children could enrol in evening classes at Saint-Benoît Catholic College.

Limited Funding

The contributions reported for school enrolment and continued education totalled 2,300 dollars and 150,000 CFA francs. Support for examination fees and new computers was mentioned, but no amount was provided.

Gaps in Records

Scholarship allocations and amounts, some class dates and partner names still need confirmation. Wellbeing, community cohesion and leadership were programme aims; this report does not claim measured outcomes in those areas.

Challenges in Delivery

Security

Insecurity linked to the Anglophone crisis affected the safety of displaced children and young people and the planning of our activities.

Transport

Travel costs and distances made it harder for children to reach classes, workshops and the Sunday tennis sessions.

Volunteers

Keeping volunteers engaged over time was difficult for continuing programmes such as the photography classes and tennis.

Conclusion

Across 2021-2022, our organisation directly reached 100 children through a combination of education, practical learning, sport and individual support.

The reporting period included school enrolment assistance, successful examinations for ten scholarship recipients, continued training opportunities and targeted responses to individual needs.

Records to accompany the report :

Programme photographs, attendance records, training certificates, school enrolment records, Ordinary Level results, scholarship letters, partnership correspondence and funding records.

THANK YOU

2021-2022
